## INTRODUCTION

In the 1961 Census, two questions relating to educational attainment were asked of each person viz., the highest grade of schooling attended and whether the person had attended school at any time during the scholastic year before June 1, 1961.

The tables in this report show the population five years of age and over by the highest grade attended for each of the two groups of persons reported as attending or not attending school. The former group largely represents the school-age population and the latter those who had completed their schooling. Further classifications of school attendance and school attainment by age groups will be presented in a later report.

A person was considered as attending school if his main daytime activity at any time between September 1960 and the census date of June 1, 1961 was attending an elementary or secondary school, university or an institution providing an equivalent type of general education.

The census inquiry on schooling provides useful information on the general levels of education of the population. However, it is difficult to provide a question on the census questionnaire which can be applied to all parts of Canada, due to the variations in school systems and grades in the different provinces. For this reason, the figures on highest grade of schooling for the population attending school are not comparable in some instances with provincial figures on school enrolments at various levels of schooling. Where this occurs, the combination of certain groups (e.g., High School 3 and 4 with High School 5) will provide more comparable figures.

Lors du recensement de 1961, chaque personne fut appelée à répondre à deux questions relatives au degré d'instruction, savoir la dernière année d'études atteinte et si, à un moment quelconque au cours de l'année scolaire antérieure au 1er juin 1961, elle avait fréquenté l'école.

Les tableaux du présent rapport donnent la population âgée de cinq ans et plus selon la dernière année d'études atteinte dans chacun des deux groupes de personnes qui ont déclaré fréquenter ou ne pas fréquenter l'école. Le premier groupe représente en majeure partie la population d'âge scolaire et le second, les personnes qui ont cessé de fréquenter l'école. Un rapport ultérieur donnera de nouveaux classements, par groupe d'âge, de la fréquentation scolaire et du degré d'instruction.

Une personne fréquentait l'école si, à un moment quelconque, entre septembre 1960 et le 1er juin 1961, date du recensement, sa principale activité durant le jour avait été la fréquentation d'une école élémentaire ou secondaire, d'une université ou d'une maison donnant un enseignement général équivalent.

La question du recensement sur la scolarité donne des renseignements utiles sur les divers degrés d'instruction de la population en général. Il est difficile, toutefois, en raison des variations entre systèmes et degrés scolaires d'une province à l'autre, d'inscrire au questionnaire du recensement une question qui vaille pour toutes les parties du Canada. C'est pourquoi les chiffres relatifs à la dernière année d'études atteinte chez la population qui fréquente l'école ne peuvent être comparés, dans certains cas aux chiffres provinciaux relatifs aux inscriptions à différents échelons scolaires. Le cas échéant, une combinaison de certains groupes (secondaire 3 et 4 et secondaire 5) donnera des chiffres se prêtant à une meilleure comparaison.
